### **Response to Arguments**

1. The indicated allowability of claims 2-5 is withdrawn in view of the newly discovered reference(s) to Abdo. Rejections based on the newly cited reference(s) follow.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller et al in view of Abdo. The rejection from the previous action is incorporated herein. Additionally, Abdo teaches an object made from a compressible pad of material. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use a compressible material to provide comfort to the user while exercising.

### ***Conclusion***

4. Claims 6-12 are allowed. Any inquiry concerning this communication or earlier communications from the examiner should be directed to L Amerson whose telephone number is (703) 306-5576. The examiner can normally be reached on Mon.-Fri from 8-5 p.m. Interviews Tue. and Thur..
